

Ethics Issues Table

4. Protection of personal data: for the end-point product, we should worry about the usage of the personal data.

- We might need to use personal data during tests, but data should be limited.
- we should choose the level of sensitivity of the personal data.
- verification process to ensure there is no discrimination
 - gender
 - nationality (should consider foreigners)
- Korea: We will be collecting SSN which includes age profiling, gender profiling.
- This is a Korean case. Each of us should worry about each country's issues.
- Germany: no personal data
- Switzerland: **maybe**

We say no to importing personal data from Korea to the EU.

- data that comes from Korea goes back to Korea

MileStones

- should focus on milestones
 - go/ no-go points: datasets & experts

Format:

- WP
 - tasks
 - deliverables
 - milestones
 - *results with progress charts*
 - checkpoints (what do you want to achieve by then?)

Milestone 1 (9 months)

Milestone 2 (6 months) - **potential customer**

Milestone 3 (6 months)

Milestone 4 (3-6 months)

TO DO:

- Letter of Intent
- Financial Plans
- Application Questions 11: Benefits of International Collaboration [Hestia & Eccenca]

In case one of the companies drop out of the project:

- hestia: still use knowledge graphs but
 - solideos: find out new area with use case

- eccensa: proceed with the project assuming an ontology.
- Eccenca: [Eccenca]

Next Meeting:

Tuesday
